QUICKSTART

1.1 Installation

Install MAdmin from pypi in a virtualenv:

```
virtualenv madmin # To create a virtualenv
source madmin/bin/activate # To activate the virtualenv
pip install madmin
```

1.2 Configuration

The configuration is located in `$VIRTUAL_ENV/etc/madmin.cfg`.

To connect to a local mongodb, use the provided example config file:

```
[mongodb]
host = 127.0.0.1
db = my_database
replica_set = rs1 # optional, only specify if replication is active
user = me # optional, specify only if auth is active
password = pssst # optional, specify only if auth is active

[rw.plugins]
rw.db = True
```

1.3 Starting

Start the application via:

```
rw serv madmin
```

INDICES AND TABLES

- *genindex*
- *modindex*
- *search*
